3. Tap the toggle to turn on Automated Check-in/out

4. Choose between **Notify** or **Automate.**

- a. When **Notify** is selected, RouteIQ notify you to check-in when you are entering the stop's geofence radius and to check-out when you are exiting.
- 5. Enter the geofence radius

Note: The geofence radius is the distance from the stop in which automated check-in/out is active.

b. When **Automate** is selected, RouteIQ automatically checks-in when you enter the stop's radius and checks-out when leave the radius.
