

Color Views - Mobile

The Color View allows users to visualize their CRM data on a map as different colored pins based on the criteria they apply. This feature is useful for organizing and identifying different types of records based on specific characteristics.

(i) Note: This feature is only available in the Professional plan. Color views need to be created on the web to viewed on the mobile.

Viewing Color Views

1. Tap the color view icon to open the color view menu.

	2:53				ul Ş	73	
Canto	nment Gon				Pace 90	& ©	F
	Bellviev	296		(74 (28) (296	90	Escambia Bay	
98) (98)	T3 Leads	- ISac	Pensac	ensacola cola Lead	1 - 1 Petro	00	H

- 3. The color view legend can be viewed by tapping the color view name in the sub menu in RouteIQ widget.
 - You can select the criteria you want to view by checking the checkbox beside it. These pins will be hidden in the map and list view.

4. To remove the applied color view, tap the close icon beside the color view name in the sub menu.
