

IP Filtering

Zoho LandingPage offers IP filtering with which you can specify the list of IPs that need not collect visitor information from your landing pages.

The functionality of IP filtering is to exclude visitor traffic from your organization. Filtering internal traffic ensures the actions of your employees and visitors are not tracked in landing page analytical reports.

To exclude an IP address from your landing page:

1. Click the **Settings icon** on the top bar.

🗊 Alfred Workspace 🗸	Pages Lead	is U	sers				۵	ه ا⊛	A	
Groups	① New Pa	age					Q 7	Sort & Filter		3
All Pages (11)			Page Name	Status	Visitors	Conversions	Conversion Ra	te		
Marketing			Zylker Properties Last Updated on Jul 26, 2023	Published	537	42	7.82 %	:		

2. Select the **IP Filtering** tab.

🗊 My Portal			4 🌘 🖩
0 Workspaces	IP Filtering The data from these IP addresses will no	t be tracked for the pages in this portal.	
S Users			
Domains	Name *	Condition IP Address*	
Integrations	Zylker work	is ^ teament	
C Files	+ Add Filter	ls	
√ IP Filtering		Range	
کم Zia Content		Regex	Save
☆ _A Language			
O Account Usage			

3. Provide a name for the filter (for example, "Work").

- 4. Select a condition from the dropdown such as **Is**, **Range**, and **Regex**.
- 5. Enter the IP address you want to exclude.
- 6. You can click the **+Add filter** to create new IP filters.
- 7. **Save** changes to apply IP filtering.
