**Zoho Corporation**

IP Address Restriction

You can now allow or deny access to your surveys based on your respondent's IP address. You can also add conditions to customize the restrictions and [add a custom message to display when a certain IP address is denied access to the survey](#).

To configure restrictions based on IP address:

1. Click **IP Address Restriction** in the *Restrictions* section on the left pane of the *Launch* tab.
2. Click **Enable**.
3. Select *Allow respondents to access your survey* if you want to allow a certain IP address(es).
4. Select *Deny respondents from accessing your survey* if you want to restrict a certain IP address(es).

5. Click the dropdown list to select one of the following conditions:
   - Equal to

- In between
- Any one of the following

6. Enter the IP address(es) in the following field.
