

Zoho Corporation

Password Restriction

You can protect your survey with a secure password.

Click **Enable** to protect your survey with a password.

ENABLE

To set a password for your survey:

1. Click **Password Restriction** in the *Restrictions* section on the left pane of the *Launch* tab.
2. Click **Enable**.

Password Protection

Set a password
(min 6 characters)

Customize the displayed content when requesting password

Password field label
(max 50 characters)

Submit button label
(max 50 characters)

Password request message
(max 255 characters)

Incorrect password message:
(max 255 characters)

3. Type in a strong password (six characters min) in the *Set a password* box. Rename the password or submit labels, if desired.
4. Complete the *Password request message* field to prompt users for a password whenever they try to access the survey. Customize the message as needed (255 characters max).
5. Fill in the *Incorrect password message* field to display an error message when someone enters the wrong password. Customize the message as needed (255 characters max).
6. Click **Save**.

Note:

To disable password protection, turn the

off in the top-right corner of the section. The knob will turn grey.
