Zoho Corporation

Deployment

Configure computers for unattended access by installing the unattended access installer. You can configure unattended access on individual computers by asking your customer to execute the file downloaded from the unattended access installer link. You can deploy unattended access on a large group of computers using the distributor, bulk deployment manager, or startup scripts.

> Note :
>
> - Please ensure you always use the latest version of the Zoho Assist Unattended Installer for enhanced performance, latest security patches and fixes and access to newest features. Using an older version, especially one over a year old, may result in compatibility issues or limitations.
> - Log in to your Zoho Assist account and navigate to Downloads to get our latest version of Zoho Assist Unattended Installer for the seamless experience .
